

E1
DT
end
5 channel and;
6 adding a listner client to said isochronous channel.

D2
1 11. (Twice Amended) The method of claim 10 [further comprising adding a listener client
2 to said isochronous channel,] wherein said listener client [being] comprises a software driver
3 routine associated with a listener node of said computer system, [by] the method further
4 comprising providing said listener client with said channel identifier.

Please cancel claim 18 and add new claim 24 as follows.

sub
E3
D3
1 24. (New) A computer system, comprising:
2 an isochronous channel having a linked list of buffers configured to receive
3 isochronous data transmitted within said computer system;
4 a sender client associated with said isochronous channel and configured to transmit said
5 isochronous data; and
6 a listener client associated with said isochronous channel and configured to receive said
7 isochronous data.

REMARKS

Reconsideration of this application, as amended, is respectfully requested. Claim 6 has been amended to recite the subject matter indicated as being allowable over the prior art. New claim 23 recites a computer system including the subject matter indicated as being allowable over the prior art of record.

Please charge any fees associated with this communication to our Deposit Account No. 02-2666.

Respectfully submitted,
